My Solution to the 2nd Problem of the HackerEarth ML Challenge (June, 2020)

Author: Niket Ganatra (GitHub: github.com/dev-niket)

You can find below the code written using MySQL which is the solution to the SQL problem (2nd Problem, named "Employee Details") of the challenge.

Code:

```sql
SELECT Employee_ID, Name
FROM Employee
WHERE Gender = 'F' AND
Employee_ID IN
(SELECT Employee_ID
FROM Service
WHERE Time_since_promotion > 1 AND Pay_Scale > 4.0 AND Unit = 'Sales'
)
ORDER BY Name
```
